The following acceleration study confirmed that the ulti med DrugControl MultiLine rapid test 008ML610 is stable under extreme storage conditions without lost of performance.

Accelerated Stability

Accelerated Stability of the ulti med DrugControl MultiLine (Urine) was evaluated using samples from three different batches, each batch will assembled in 10 in 1 Cassette. These were placed in an incubator with the temperature calibrated at 45°C and 55°C, and relative humidity (RH) calibrated at 60%. A series of stability tests were performed at 7, 14, 21, 28, 35, 42, 56, 77, 84 days. Tests were assayed using each test concentration at drug free urine, -50% Cut-off and +50% Cut-off urine specimens. Testing at each specific time interval consisted of triplicates for each specimen. The tests were performed according to the package insert. Results are presented in tables below.
